

Carbon Reduction Plan

Mediwhale Inc.

Mediwhale Inc. is committed to achieving net zero emissions by 2045.

Baseline Emissions Footprint vs Current Emissions Footprint

Baseline emissions are a record of the greenhouse gasses that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Carbon Reduction: Projected vs Actual

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets. We project that carbon emissions will decrease over the next years to 0.2688 by 2045 this is a reduction of 90%

Carbon Reduction Projects

The following environmental management measures and projects are currently in progress or have been completed since the 2025 baseline.

Actions In Progress

Appoint a sustainability champion

Target Completion Date: 31/12/2026

Objective

To strengthen sustainability governance by assigning responsibility for coordinating and promoting sustainability initiatives across the organisation.

Target

A sustainability champion is appointed and supports the implementation and monitoring of sustainability actions.

Action, Improvement or Control

A sustainability champion will be nominated to coordinate sustainability activities, encourage engagement and act as a central point of contact for sustainability-related matters.

Improve data granularity and stakeholder data quality

Target Completion Date: 31/12/2027

Objective

To improve the accuracy, consistency and reliability of the organisation's carbon footprint by increasing the level of detail and quality of data obtained from internal stakeholders and external suppliers.

Target

Increase the proportion of emissions calculated using detailed, source specific data obtained directly from stakeholders, suppliers and service providers across key emission categories.

Action, Improvement or Control

Processes and communication channels will be strengthened to support the collection of more detailed and accurate emissions related data from relevant stakeholders and suppliers. Data requests will be standardised where appropriate to encourage the provision of higher quality information, such as actual consumption figures, activity data and source specific records rather than aggregated or estimated values.

Encouraging the use of rail over car travel

Target Completion Date: 31/12/2027

Objective

To reduce emissions from business travel by encouraging the use of rail instead of car travel where practical and operationally suitable.

Target

Increase the use of rail travel for business journeys where a suitable rail alternative is available and practical.

Action, Improvement or Control

The organisation will update its travel guidance to identify rail as the preferred option for suitable business journeys. Staff will be encouraged to consider rail travel before using a car.
